

Anas Alhalabi

Full-stack Developer — Mobile-first Software Engineer

anas.alhalabi.official@gmail.com | +966500370664 | [LinkedIn](#) | [GitHub](#) | [Website](#)

Professional Summary

Full-stack developer with a mobile-first focus and 4+ years delivering production iOS/iPadOS apps, web dashboards, and backend microservices. Shipped two live App Store apps at Karage, including a customer-facing app serving 5,000+ users. Skilled in Swift, SwiftUI, Xcode, Next.js, TypeScript, Node.js, and ASP.NET Core, with hands-on experience across REST APIs, PostgreSQL/Supabase, CI/CD, unit testing, and AI-assisted development. Strong collaborator who improves reliability, observability, and release workflows.

Professional Experience

Software Engineer — Karage | Dec 2021 – Present

- Built and launched [My Karage](#), a customer-facing iOS app with booking and payment features, integrating REST APIs and secure storage; reached 5,000+ users with measurable improvements in booking experience and customer engagement.
- Developed [Karage Kash](#), an iPadOS point-of-sale app in Swift and SwiftUI, focusing on reliability and accessibility.
- Instrumented tracking and analytics with Smartlook, AppsFlyer, and Google Analytics to measure user behavior, campaign attribution, and retention, informing product and growth decisions.
- Improved a Next.js and TypeScript reporting dashboard for invoicing and analytics, backed by Node.js services and a Supabase (PostgreSQL) datastore, enhancing data accuracy and UX.
- Enhanced ASP.NET Core microservices through schema fixes, API documentation, and performance tuning.
- Led code reviews, established architecture standards, and managed the Apple developer account migration.
- Added unit tests to core modules (~80% coverage) and CI pipelines, increasing deployment confidence and reducing regressions.

AI-Assisted Development (Claude Code) — Personal & Professional Projects

- Use Claude Code daily to accelerate prototyping, debugging, and technical documentation, reviewing AI-generated output for correctness, performance, and maintainability before shipping.

Volunteer Mentor Lead — LabLab MENA | May 2023 – Jul 2023

- Mentored hackathon teams on technical execution, architecture decisions, and deployment strategies.
- Organized workshops and provided developer support to improve project delivery and code quality.

Website Developer — Marn | Sept 2021 – Dec 2021

- Built Webflow CMS solutions and collaborated with designers to deliver responsive web experiences.

Education

Bachelor of Science in Software Engineering — University of the People | June 2025

Certifications

- IELTS Academic — Score: 7
- Prompt Engineering — DeepLearning.AI

Technical Proficiencies

- Tools & Platforms: VSCode, Git, GitHub Actions, Docker
- Languages & Frameworks: Swift, SwiftUI, C#, JavaScript, TypeScript, Node.js, React, Next.js
- Datastores & APIs: SQL, PostgreSQL, Supabase, RESTful APIs, microservices

- Practices: CI/CD, unit testing, code reviews, architecture, Agile

Languages

- Arabic — Native
- English — Professional Proficiency
